

INVENTO S110 R134a semi-automatic AC station

INVENTO S110 Semi - Automatic Air Conditioning Service Device

The INVENTO S110 is a modern device designed for quick and hassle-free servicing of air conditioning systems in passenger cars and light commercial vehicles.

Description

INVENTO S110 Semi - Automatic Air Conditioning Service Device

The INVENTO S110 is a modern device designed for quick and hassle-free servicing of air conditioning systems in passenger cars and light commercial vehicles. With its intuitive interface, including a 2.8-inch LCD display, and an extensive vehicle database, air conditioning servicing becomes remarkably easy and comfortable. Its compact design enables easy transport and on-site service delivery.

The device allows for full automation of the servicing process, from gas recovery to system recharging. Thermal printer outputs provide precise reporting of completed tasks, and the optional database updates ensure long-term functionality.

With robust construction, advanced features, and a 2-year warranty from a reputable manufacturer, the INVENTO S110 is an excellent choice for professional air conditioning service providers.

Key Features:

1. **Supported Gas:** R134a
2. **Display:** 2.8" LCD
3. **Mobility:** Compact design for easy transport
4. **Semi - Automatic Servicing Process:** manually operated valves.
5. **Manual Function Selection:** Allows individual tasks such as gas recovery, leak tests, or vacuuming.
6. **Easy Transport:** Mobile construction facilitates fieldwork.

7. 2.8" LCD Display

8. **Menu language:** English, Hungarian, Polish, Russian

Technical Specifications:

- **Supported Gas:** R134a
- **Display:** 2.8" LCD
- **Vacuum Pump Capacity:** 120 L/min
- **Cylinder Capacity:** 10 kg
- **Service Hose Length:** 2m
- **Oil Bottle Capacity:** 300ml
- **Device Weight:** 80kg

By combining modern technologies and intuitive operation, the INVENTO S110 meets the expectations of both professional service centers and mobile air conditioning service providers.
