

# Pneumatic jack 3T

The INVENTO J3C air jack is a high-quality, professional equipment that is designed to work in vulcanization services, car workshops and home garages!

## Description

---

INVENTO J3C air jack is a high-quality, professional equipment that is designed to work in vulcanization services, car workshops and home garages! vulcanization, car workshops and in home garages.

INVENTO J3C can pick up 3 tons, so it is perfect for servicing passenger cars or delivery vans. Telescope inside the lift ensures the stability of the entire system during operation! The operating pressure of the INVENTO J3C is between 6 and 12 bar.

Specification and advantages of the jack:

- The internal telescope ensures the stability of the entire system during operation,
- SAFETY VALVE - protects against destroying the jack at too high pressure!
- A rubber prevents the car from accidentally sliding off during operation,
- The stable surface of the jack's base ensures correct operation of the devices, even with slight unevenness of the surface.
- Thanks to wheels the transport of the jack is very convenient,

Technical data:

Capacity: 3,000 kg  
 Lifting height: 400 mm  
 Minimum height: 150 mm  
 Working pressure: 6 - 12 bar  
 Weight: 18 kg
