

INVENTO Balanced bracket 1,5 m, 500 kg

1,5M beam to hold up to 500kg.

Description

The INVENTO 500kg engine mount beam is a robust beam designed for long term use. Reinforced construction and thicker profiles provide strength, allowing the beam to hold up to 500kg.

Strong chains and mounting anchors ensure safe and stable suspension. INVENTO beam has rubber fender protectors, which take care of your safety.

Technical data:

- Load capacity: 500 kg
- Adjustable distance between fender mountings: from 720 mm to 1450 mm
- Total length: 1500 mm
- Anchor length: 340 mm
- Includes: 2 chains, each 89 cm long

The INVENTO engine support bar is not only a guarantee of solidity and durability, but also a practical solution for any mechanic or car enthusiast, providing safe and effective support during repair work.
